

bad times everywhere

it's a bad time
everywhere

millions are
jobless

wall street
has collapsed

the fat cats
have all croaked

the country is
in debt

a war is on

the earth is
burning up

and there's lead paint
in our toys ,

millionaires
were losing their
assets
but still had
more than the
poor

the poor are
still poor
and feeling it

the middle class,
huh, what middle class?

homes are
foreclosing

banks are

going bankrupt

small businesses
are dying in the belly
of big businesses

prisons are
overflowing

the forests are on
fire

and I can't
get a drink
because
the tap
has run
dry.
